

# NEUROTOXIN

## TREATMENT GUIDE

### Post-Care Expectations:

- Results may be expected from 24 hours up to 7 days after injection.
- Bruising varies between patients. Usually minimum bruising occurs and resolves within 2-3 days. On occasion, bruising may be more significant and last up to 7-10 days.

### Post-Care Instructions:

#### DO's:

- Remain upright for 4 hours after injection.
- Exaggerate facial expressions in injected areas for 1 hour after injection.

#### DO NOT's:

- Do not take ibuprofen, aspirin, vitamin E, fish oil, for 48 hours prior to or after injection.
- Do not massage or manipulate injection sites for 48 hours after injection.
